

Commodity Credit Corporation, USDA

§ 1466.5

Wildlife means birds, fishes, reptiles, amphibians, invertebrates, and mammals along with all other non-domesticated animals.

§ 1466.4 National Priorities.

(a) The following National priorities will be used in the implementation of EQIP:

(1) Reductions of nonpoint source pollution, such as nutrients, sediment, pesticides, or excess salinity in impaired watersheds consistent with TMDLs where available as well as the reduction of groundwater contamination and the conservation of ground and surface water resources;

(2) Reduction of emissions, such as particulate matter, nitrogen oxides (NO_x), volatile organic compounds, and ozone precursors and depleters that contribute to air quality impairment violations of National Ambient Air Quality Standards;

(3) Reduction in soil erosion and sedimentation from unacceptable levels on agricultural land; and

(4) Promotion of at-risk species habitat conservation.

(b) With the advice of other Federal agencies, NRCS will undertake periodic reviews of the National priorities and the effects of program delivery at the state and local level. The Chief intends to annually review the National priorities to adapt the program to address emerging resource issues. NRCS will:

(1) Use the National priorities to guide the allocation of EQIP funds to the State NRCS offices,

(2) Use the National priorities in conjunction with state and local priorities to assist with prioritization and selection of EQIP applications, and

(3) Periodically review and update the National priorities utilizing input from the public and affected stakeholders to ensure that the program continues to address national resource needs.

§ 1466.5 National Allocation and Management.

The Chief allocates EQIP funds to the State Conservationists to implement EQIP at the state and local level. In order to optimize the overall environmental benefits over the duration of the program, the Chief of NRCS will:

(a) Use an EQIP fund allocation formula that reflects National priorities and measures and that uses available natural resource and resource concerns data to distribute funds to the state level. This procedure will be updated periodically to reflect adjustments to National priorities and information about resource concerns and program performance. The data used in the allocation formula will be updated as it becomes available.

(b) Provide a performance incentive to NRCS in States that demonstrate a high level of program performance in implementing EQIP. Performance incentives shall consider factors such as strategically planning EQIP implementation, effectively addressing National priorities and measures and state and local resource concerns, the effectiveness of program delivery, the use of Technical Service Providers, and the number of contracts with Limited Resource Producers and Beginning Farmers. These funds will be made available annually from a reserve established at the National level when funds become available.

(c) Use NRCS's accountability system to establish state level EQIP performance goals and treatment objectives.

(d) Ensure that National, state and local level information regarding program implementation such as resource priorities, eligible practices, ranking processes, allocation of base and reserve funds, and program achievements is made available to the public.

(e) Consult with State Conservationists and other Federal agencies with the appropriate expertise and information when evaluating the considerations described in this section.

(f) Authorize the State Conservationist, with advice from the State Technical Committee and Local Work Groups, to determine how funds will be used and how the program will be administered to achieve National priorities and measures in each state.

(g) Move towards assessment, evaluation and accountability based on actual natural resource and environmental outcomes and results.
